

Agilent Technologies

Subject: Agilent Technologies Climate Change Position Statement

As a company focused on inspiring scientific discovery, Agilent recognizes the wide-ranging implications of climate change—affecting water resources, agriculture, biodiversity and public health. For close to 50 years, Agilent has provided [environmental solutions](#), analysis and regulatory expertise through its instruments, accessories, consumables and services. We are at the forefront of addressing this critical global issue by helping customers around the world understand and measure the impact of climate change.

Agilent's own response to climate change is integrated into its emphasis on doing business in a sustainable manner in every community in which we operate. We continue to undertake energy efficiency and clean and renewable energy projects that reduce greenhouse gas emissions and promote environmental responsibility. For more details, see [Agilent's Environmental, Health and Safety Policy](#) and our latest [Corporate Citizenship Report](#).
